Arnold Christopher Fernando
Software Engineer

I am a developer with a strong desire to provide people with visually appealing yet practical systems. My first two years in the field have exposed me to a variety of skills; from technical to managerial.

WORK EXPERIENCE

Mid-Level Software Engineer

Yamanabu Network Services Philippines
09/2017 - present

- Implemented new features and maintained projects using languages such as **HTML5**, **JavaScript**, **PHP**, **SQL**, and **Git**

- Took part in creating systems such as **CMS**, **POS**, **API**, and **hybrid mobile apps**.

- Designed specifications based on requirements.

- Broke down the specs into tasks, and then assigned them to the team members.

- Oversaw the project progress and strategized accordingly.

- Gave exams to applicants and **handled new developers**.

- **Improved the training system** by assigning mentors to new recruits and creating events to help them settle in.

Freelance Developer

09/2016 - present

- Produced systems for individuals and small organizations with utmost client satisfaction.

- Designed optimal and normalized database structures.

- Projects ranged from small systems such as a **live electricity bill app** to **sentiment analysis**.

- As of the moment, mostly taking on mobile apps using **Ionic 4**, **Angular 7**, and **Vue JS**.
